

INTEGRATED TECHNOLOGY FOR CONSIDERED SPACES

AVP

Company Profile

Six integrated technology solutions for residences, workplaces, hospitality and critical sites.

Technology should feel considered, not complicated.

AVP brings together six systems that shape a space every day: security and surveillance, access and fire safety, smart automation, professional audio and video, renewable energy, and Wi-Fi solutions.

- **Security and surveillance**

Visibility, recording and response designed around the site.

- **Access and fire safety**

Controlled movement and life-safety coordination.

- **Smart automation**

Lighting, comfort and intuitive control that fits the space.

- **Professional audio and video**

Clear communication, presentation and sound experiences.

- **Renewable energy**

Metering-led planning for resilience and operational insight.

- **Wi-Fi solutions**

Reliable connectivity for people, devices and operations.

PROJECT OWNERSHIP

Coordinate the system mix, milestones, commissioning and documented support route around the way the space is used.

SECTOR FLUENCY

Different spaces. One clear standard of care.

The right technology balance is different in every environment. AVP begins with people, journeys and operating realities - then shapes the system around them.

- 01 Private residences
- 02 Corporate and commercial
- 03 Hospitality and wellness
- 04 Retail, industrial and critical sites

Six disciplines. One accountable design conversation.

The value is in the joins: systems selected, planned and commissioned so the people using the space experience one coherent environment.

01

Security & surveillance

CCTV, perimeter awareness and incident readiness.

02

Access & fire safety

Visitor flow, credentials, controlled movement and safety coordination.

03

Wi-Fi solutions

Coverage, capacity and secure segmentation.

04

Professional audio & video

Meetings, displays, sound and managed AV.

05

Smart automation

Lighting, shades, scenes and intuitive control.

06

Renewable energy

Metering, insight and operational efficiency.

Practical scope, tailored to the site.

The examples below are described without unverified outcomes or performance claims.

ColdEX	Integrated security, access and connectivity elements aligned to a cold-chain operational brief.
Vodafone	CCTV delivered for stores across Delhi NCR.
IndusInd Bank	CCTV and intrusion alarm systems delivered for one banking centre each in Delhi, Faridabad and Pune.
Brindco	Wi-Fi delivered for a new office building in Okhla.

**DEPLOYMENT
& SUPPORT**

Milestones, commissioning records and the agreed service path aligned to the project scope.

START WITH THE SPACE

Tell us what you are planning.

A first conversation can define the opportunity, clarify constraints, establish the desired timing and identify the right technical and service path - whether you are designing a residence, opening a workplace or strengthening an operational site.

**LET'S PLAN THE
RIGHT SYSTEM MIX.**
